▪ *Mathematical formulae*

- Before including a mathematical expression, consider whether it is really useful.
- A calculation formula should be in such a form that the values measured in the test procedure can be substituted directly into the formula without intermediate calculation after the analysis.
- Symbols in mathematical expressions are arranged in the order in which they appear in the test procedure, where possible. However, mathematical rules must be respected.
- For presentation reasons, numbers are placed after symbols.
- It is preferable to present a product of quantities and their quotient in the following ways:
- For more complicated formulae, multiplication signs must be used.

$$Error \text{ (\%)} = \frac{C_m - C_n}{C_n} \times 100$$

$$C.V. \text{ (\%)} = \frac{SD}{C_m} \times 100$$

$$\leq \left\| \oplus \Leftarrow \forall \not\subset \Re \amalg \int \theta \phi \lambda \varpi \Phi \int \int \overset{\cap}{\longrightarrow} \right\|$$

Cross References Testing

Testing Table

This is testing cross reference contains two REF and _Ref (Ref [Figure 3](#))

This is testing cross reference Table + Entire Caption (See [Table 6-1](#))

This is testing cross reference Table + Only Label and number (See [Table 6-2](#))

This is testing cross reference Table + Only caption text (See [table containing BodyTabSm styleTable 6-2](#))

This is testing cross reference Table + Above/Below (See [aboveTable 6-2](#))

Testing Bookmark

This is testing cross reference Bookmark + Page Number (See Page [14](#))

This is testing cross reference Bookmark + Paragraph Number (See [1](#))

This is testing cross reference Bookmark + Bookmark Text (See [bookmarks](#))

This is testing cross reference Bookmark + Paragraph Number No Text (See [1](#))

This is testing cross reference Bookmark + Paragraph Number Full Text (See [1](#))

This is testing cross reference Bookmark + Above/Below (See [below](#))

Testing Numbered Items

This is testing cross reference Numbered Items + Page number (See Page [14](#))

This is testing cross reference Numbered Items + Paragraph Text (See [Heading 1](#))

Testing Heading

This is testing cross reference Heading + Heading Text (See [symbol font in heading 1 “μ” – Mu](#))

This is testing cross reference Heading + Page Number (See [9](#))

Testing Footnote

This is testing cross reference: Footnote number (See [1](#))

This is testing cross reference: Page number (See [10](#))

This is testing cross reference: Footnote number Formatted (See [1](#))

Testing Endnote

This is testing cross reference: EndNote number (See [i](#))

This is testing cross reference: Page number (See Page [14](#))

Testing Equation

This is testing cross reference: Equation Number (See [Equation 1](#))

This is testing cross reference: Only Label and Number (See [Equation 1](#))

This is testing cross reference: Page Number (See Page [13](#))

This is testing cross reference: Only Caption Text (See [Caption 1](#))
